**Subject:** Re: question - Well Post 1 and 2

Post 1 and 2 are not wells that Cabot reported on spud dates, frac dates, etc, since they are just outside of the perimeter of the "site " boundary. Jim is checking the DEP web site. The dates listed make sense it can be drilled months or a year before it is hydraulically fractured.

**Subject:** question - Well Post 1 and 2

Could one of you fine geologists tell me when Post 1 and 2 were spudded in or first worked. I am finding two different dates.

<http://www.hydraulicfracturingdisclosure.org/fracfocusfind/> is telling me they were frac'd in July 2011, while [www.marcellusgas.org/](http://www.marcellusgas.org/) is telling me Post - 2 was drilled Oct 2010.

thanks...  
Rich
